

## Burnside Street Names and their Origins

### Appendix 2 – Unknown Street Names

The following is a list of those roads for which information is required.

#### Unknown – Marked ‘U’ below

There are 36 streets where the origins of the names are totally unknown.

#### Guesses – Marked ‘G’ below

There are 154 streets where the origins described in the street name descriptions are probably only guesses on the part of the researchers. There may be historical reasons for these names but further supporting information is still required. The following names are in the list:

- names of towns or locations in England such as Anglesey Avenue, St Georges,
- names that may be ships names such as Alpha Street, Kensington Park,
- names that may be based on Aboriginal words, such as Allinga Avenue, Glenunga,
- names that sound like the name of a person,
- miscellaneous other names.

#### Exclusions

The list does not include streets where the name is self-descriptive or falls into a group of similar names even though the *reason* for the name is not known. It is probable that the reason for these names is not particularly historic. The following are excluded from the list:

- names of trees or plants such as Almond Avenue, Glenside,
- names of plants terminated by ‘bank’ such as Brierbank Terrace, Stonyfell,
- names that are descriptive of the environment such as Alpine Place, Skye,
- names of poets such as Burns Avenue, Hazelwood Park,
- names of grape varieties such as Hermitage Road, Auldana.

The Burnside Historical Society welcomes information to provide or improve any descriptions. It can be provided by forwarding the form shown in Appendix 3.
