Pepper News insert: October/November 2024

Tiny Treasures!

Boost creativity and wellbeing in these 'science + art' focused workshops for adults. Dr Celeste Hill describes these sessions: "I present engaging insights on why playful exploration is so powerful for boosting adult wellbeing - it's not just for kids! Breaks from routine, with curiosity and playfulness are powerful ways to activate your brain's ability to renew and evolve. We use a range of tools including microscopes and UV lights to see nature in different ways. You will create a fun memento using the shared ideas for finding play points in day-to-day life, which will last long after the workshop is over. This is a small group experience and 'no pressure' opportunity." For greater detail please contact Celeste via the information below. **\$60 per session includes all materials and take home memento.**
